Karthika Kalimuthu

Theoretical Document for DevOps Pipeline Process- Week 5

Step 1 : Select the Version control system (VCS) to continue. In my case it is Azure
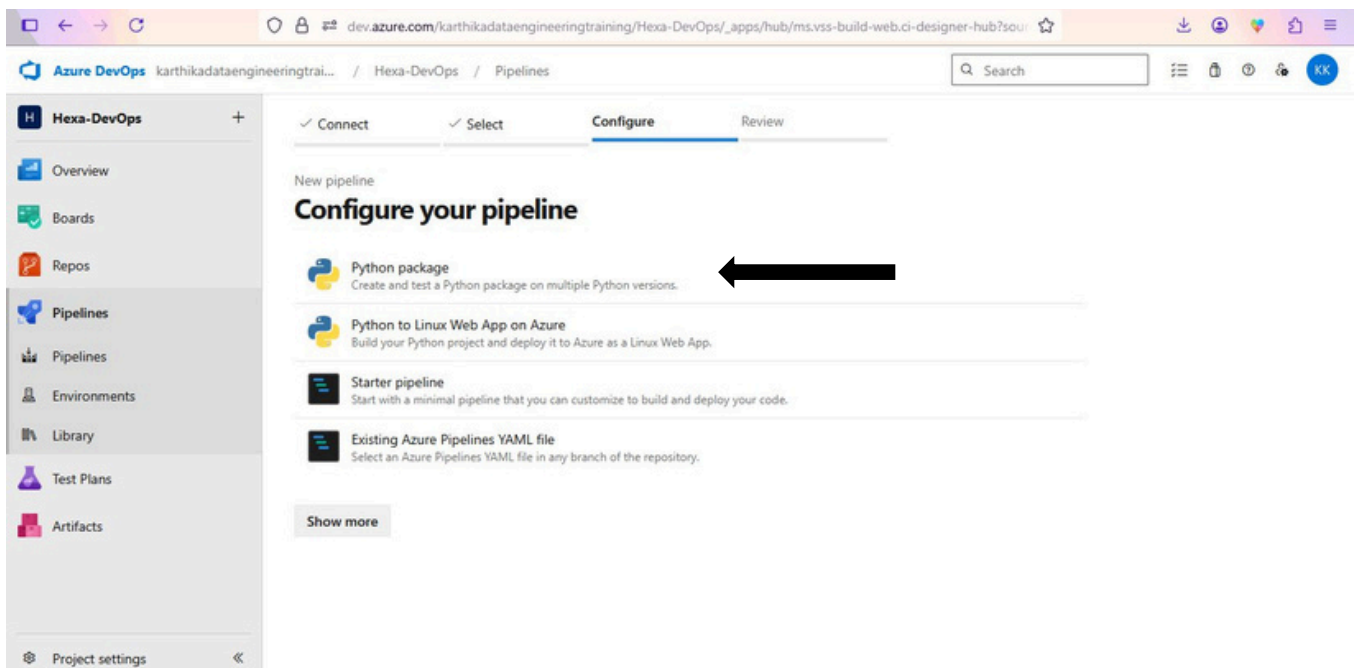

Repo Git.

Step-3:

Select the respective repo at which the code, datasets are present. In my case it is present in Hexa-DevOps

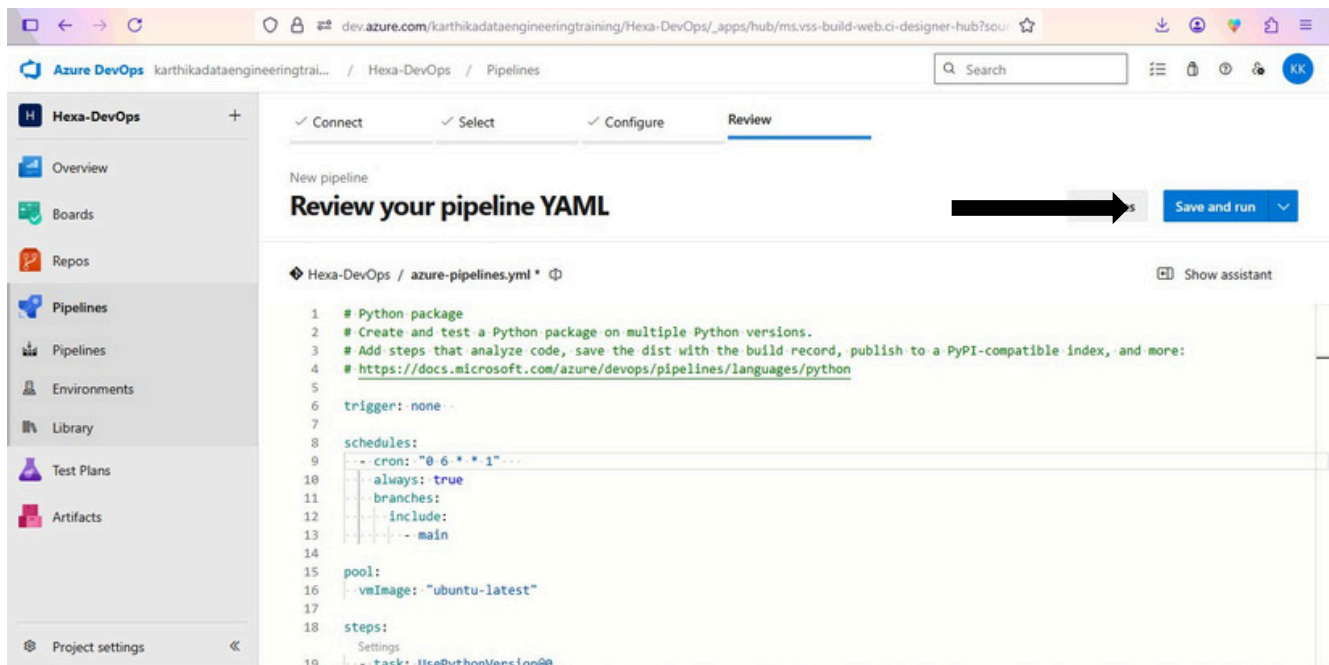

Step-4:

Then select python package to configure the pipeline.

Step-5:

Ensure the YAML file configured properly

Step-6:

Once all configurations are set then click save and run
